**Herb Corner...Tea to Go!**

There has been much written and discussed over the past years about tea, specifically Green Tea. The health benefits of this delightful drink are being explored daily.

Nature's Sunshine Products offers you all the benefits of Green Tea in pill form in their Green Tea formula (stock #1096-6 -- 60 capsules).

**Green Tea** is made from the unfermented leaves of the tea plant, *camellia sinensis*. Legend states that over 4000 years ago a Chinese emperor was boiling water while sitting under a tree. A few of the leaves from the tree fell into the boiling water and people have been drinking tea ever since.

Green Tea has been documented to have antioxidant, anti-cancer, anti-tumor, cholesterol-lowering, immune-boosting,

and antimicrobial properties.

Studies done in China and the United States (University of Texas) have shown that this amazing plant lowers the risk of cancer of the stomach and esophagus, as well as the bladder, rectum, lung and pancreas.

New studies are indicating that Green Tea may help reduce high blood pressure and prevent abnormal blood clotting in addition to lowering cholesterol.

Worried about caffeine...don't! This product is naturally decaffeinated. Three pills a day are equal to 10 cups of tea.

Mention this article and receive a 15% discount on your purchase of NSP

## Eucalyptus

Eucalyptus is not a common perfumery ingredient but it has been used in traditional herbalism and aromatherapy for a variety of problems.

The eucalyptus tree is an evergreen tree with bluish-green oval leaves. This tree is native to Australia and Tasmania but can also be found in Florida, California, Russia, China, Portugal and Brazil.

Eucalyptus has been used traditionally to treat bronchitis, asthma and other respiratory problems including smoker's cough. It has also been used to treat malaria, typhoid, cholera and other infectious, fever-causing diseases. Extracts of eucalyptus are used for joint pain, ringworms, and tuberculosis.

Traditional herbalism has Eucalyptus being used for a wide-range of actions including, but not limited to: analgesic (pain-relieving), antineuralgic, antirheumatic, antiseptic, antiviral, decongestant, deodorant, parasiticide, and stimulant. The oil is usually obtained through steam distillation.

Aromatherapy traditions use eucalyptus for: burns, blisters, cuts, herpes, insect bites insect

repellent, lice, skin infections, wounds, muscular aches and pains, poor circulation, rheumatoid arthritis, sprains, asthma, bronchitis, coughs, sinusitis, throat infections, cystitis, chickenpox, colds, flu, headaches and nerve pain (neuralgia).

Eucalyptus is generally regarded as safe and is considered non-toxic, non-irritating, and non-sensitizing.

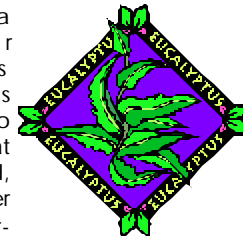

We offer a unique blend of Eucalyptus, Lavender and Tea Tree essential oils for easy in-home or office usage. Pour a few drops into an oil burner for immediate relief of upper respiratory problems. This is also

safe to use in a vaporizer at home.

Eucalyptus is found in only a few fragrances: Escape type for Men and Contradiction type for Men. We also offer Eucalyptus fragrance oil (may contain some essential oil), but this is safe for skin application.

Do you prefer your scent in stick form, then try Eucalyptus incense by Suchi Shama or Tulasi.

This is an excellent addition to any home's first-aid kit and a must have for the winter cold and flu season. ☀

# Fragrance Suggestions

In our last few issues we noted that there are four major categories of fragrances within perfumery: floral, fresh, woody and oriental. Previously we discussed Citrus, Green, Water, Soft Floral and Floral groups. This issue will focus on Floral Orientals.

## Floral Oriental Fragrances

Floral Orientals are, according to Michael Edwards "soft, spicy orange flower notes melded with aldehydes and sweet spices..."
